Interactive science workshops

The Fairfield Project and Science Learning Hub welcome primary teachers to attend our free, interactive science workshops.

These are designed specifically to support the Primary Science Week theme - *Eco-warriors*.

Each workshop will have a slightly different focus – and you are welcome to attend either one or both. *In both workshops we will:*

- make specific connections to learning across the curriculum
- share useful resources
- explore how learning can be connected to the local environment

There will be no cost to attend.

1

WORKSHOP 1 *'Exploring the world around us'*

Tues May 8 from 3.30-5pm. Venue: Fairfield College library.

In this hands-on workshop we will model simple and engaging activities that foster a range of science skills. We will focus on building curiosity through observation and interaction with the environment using a contextual, integrated approach.

2

WORKSHOP 2 *'Hands on in our backyard'*

Sat May 12 from 9.30am-12pm. Venue: Fairfield College library.

This workshop will introduce a range of practical ecology-based activities using everyday materials. The activities will be easily transferable to your own setting and will focus on building students science capabilities. We will model an integrated style of teaching and learning, fostering a student centred approach.

Please register your interest by providing your name, school, contact details and indicate which workshop/s you wish to attend to our enquiries email –thefairfieldproject@gmail.com
